Strengthening the Link between Migration and Development: Testing an Integrated Service Provider to Moldovan Migrants and their Communities

NEXUS Moldova is an EU/SDC sponsored prototype. It is a *market-driven initiative*, one which is expected to continue in Moldova past the initial 36 months of the project. Based on experience gained in Moldova a network of linked **NEXUS** operations will expand into the broader SEE region and beyond.

An IASCI-led consortium implements **NEXUS Moldova**. Partners include the State Chancellery and six rayons and municipalities. Its primary objective is to foster links between migration and development at the local level by developing durable capacities and systematic collaboration between these partners and with social- and private-sector stakeholders.

In an innovative and practical way **NEXUS Moldova** partners with private sector enterprises, civil society and public institutions to identify, design and provide migrants with services that support successful circular migration practices. Day-to-day activities directly address a situation of imperfect information and market fragmentation, resulting in all stakeholders being better placed to confront the social and economic challenges of migration – and seize opportunities in an otherwise largely untapped market segment.

Activity Area 1: Capacity-building. This directly impacts both policy and technical level capacities of the governmental partners at national and local levels, specifically through its insistence on having service providers engage in a meaningful and holistic manner with a range of beneficiary groups.

Activity Area 2: Developing, Testing and Adapting. This involves (building and) operating service centers in four pilot areas (Cahul, Edinet, Ungheni and Chisinau) and an online virtual service center. The online center provides migrants/diaspora information and services they need with an intuitive and user-friendly interface. From the migrants' perspective it combines social media and social commerce capabilities, and thus provides them a single location to join, engage in self-help.

The NEXUS Moldova Mission is to build vibrant public-private partnerships that help beneficiaries “migrate smarter and return better.” NEXUS is based on the Core Value that migration is ultimately a positive force, and every aspect of the initiative reflects that value.
